SLATE ROOF MOUNTING SYSTEM

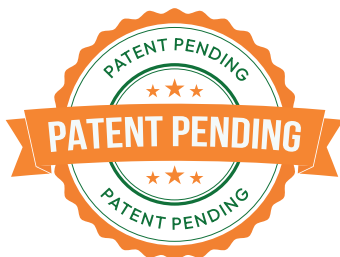

SAFETM SLATE

25 YEARS
WARRANTY
★★★★★

The SafeSlate™ Slate Roof Mounting System provides a fast, secure, and non-destructive method for installing solar mounting systems on slate roofs.

Designed to eliminate grinding, adhesives, and slate removal, SafeSlate™ introduces a precision drill-and-slide installation method, allowing installers to complete slate roof installations safely while maintaining roof integrity. Installations can be completed up to 75% faster compared to traditional methods.

KEY FEATURES:

- Up to 75% faster installation
- No grinding or slate cutting required
- No adhesives or chemical bonding
- Reduced slate cracking risk
- Mechanical watertight compression seal
- Installer-friendly drill & slide system
- Maintains roof waterproofing integrity
- Supplied with professional drilling solution

KIT CONTENTS:

- SafeSlate™ Slate Flashing
- Compression Gasket
- Anchor Bolt Assembly
- 25mm Tungsten Carbide Hole Saw
- Installation Instructions

RECOMMENDED APPLICATIONS:

- Solar PV installations on slate roofs
- Retrofit installations
- Residential & commercial projects

UP TO 75% FASTER INSTALLATION

INSTALLATION:

1. Drill 25mm hole through slate.
2. Slide flashing beneath upper slate.
3. Align flashing with drilled hole.
4. Insert anchor fixing.

TECHNICAL SPECIFICATION:

Drill Type
Tungsten Carbide Hole Saw

Roof Type
Natural & Artificial Slate

Seal Type
Compression Cone & Gasket

Waterproofing Method
Mechanical Compression Seal

Slate Removal Required
No

Grinding Required
No

Adhesives Required
No

Application
Solar PV Mounting

Material
Corrosion Resistant Metal

Fixing Type
Anchor Bolt System

Installation Speed
Up to 75% faster
